PUCHPASS

We have an app to let you easily access your account, reservations, and passes while on the go. However it's not available in 'App' stores - ours is installed a little differently because it is what is called a 'Progressive Web App'. Below are instructions on how to quickly install it, for both <u>iPhones</u>, <u>iPads</u>, and <u>Android</u>. Thank you!

iPhone Installation:

Apple does not prompt you to install the app, so it needs to be done manually. It's simple - click on the **Share** button in the middle of the nav bar, scroll down and choose **Add to Home Screen**, and then click Add on the next page. Click on the icon on your homescreen to get started.
